

# New Zealand Marine Research Foundation

Through high-quality research, we will be better equipped to balance the demands on our marine environment

📍 Nationwide

## OUR CURRENT RESEARCH

Despite fishing being recognised as one of the most popular recreational activities in New Zealand, we've never stopped to add up exactly how much it is worth to the country.

For recreational fishing to be valued by our leaders, the decision makers and our communities, we need to know what it is worth to the economy.

The New Zealand Marine Research Foundation (NZMRF) are stepping up to the challenge. We have contracted the international experts on valuing recreational fishing to research and publish a report describing the value of recreational fishing to the New Zealand economy.
